Kostelac Rendering Company  
R. R. No. 3  
Belleville, Illinois 60104

Lewistown Locker  
Lewistown, Illinois 61542

M. and L. Service  
P. O. Box 66  
Belleville, Illinois 60507

Millstadt Rendering Company  
Millstadt, Illinois 62260

Rendispos Corporation  
4800 S. Adams Street  
Peoria, Illinois 61601

Sacramento Rendering Company  
Jackson Road - P. O. Box 1943  
Sacramento, California 95809

Streck Packing Company  
401 W. Washington Street  
Belleville, Illinois 62220

These new members were obtained through the efforts of Lew Ziegler, recently retained to explain the goals and program of FPRF to renderers, meat packers, poultry processors, industry suppliers and related companies or groups that are interested in increased utilization of animal and poultry fats and by-product proteins. If these new members (or any of our old members, for that matter) have suggestions and comments on our research program or other activities, please send them in. Your interest and advice, as well as your membership contribution, are needed to assure the continued success of your Foundation's program.

#### FAT AND DERIVATIVES FOR CONCRETE

It takes time, effort and money to move research findings from the laboratory to commercial production and distribution. Commercialization of TCST and TALENT is no exception! But we are working diligently on this. A number of companies have expressed interest in TCST and active negotiations are in progress with one company to license the manufacture and distribution of TCST under our pending patents.

One rendering company has been licensed under our pending patents to produce and distribute the fat-containing admixture for cement products. But despite the interest and enthusiasm expressed at the TALENT seminars held last December we have not yet licensed an NRA or FPRF member to produce TALENT. If your company is interested in obtaining licenses under our pending patent and the trademark, please let us know soon. Unless they are commercialized research results can't sell fat!

#### ERROR

In the February 20, 1968 "Director's Digest" all of the column headings in Table 2 should be  $\mu\text{g/g}$  rather than  $\text{mg/g}$ .
